Integration Possibilities

*Free added value to Your
SharePointLMS investments!*

Collaboration and communication tools to help students succeed today and stay connected tomorrow.

Introducing Microsoft® Live@edu. It's free, familiar, reliable Windows Live Hotmail® with your organization's name on it for students and alumni. And, it's more than just e-mail. Live@edu includes many other programs and services designed to increase your campus' ability to collaborate and communicate including calendars, mobile alerts, document sharing, blogs, instant messaging, video chat, mobile access and address books.

Microsoft Live@edu is a platform that supports the collaborative campus of the 21st century. With five Gigabytes of storage, students can participate in online tutorials, collaborate on assignments, debate with faculty, and build lifelong relationships with your educational institution. Live@edu operates on popular Web browsers for the PC, Mac and Linux—and it's not only free: it's easy to set up and administer.

The central graphic features the "Live@edu" logo in a large, grey, sans-serif font. Surrounding the logo are seven circular icons, each with a colored border and a central image representing a service. The services are arranged in a roughly circular pattern around the central logo. The services include: Hotmail (5GB inbox), Mobile (Now on your mobile phone), SkyDrive (Get 25GB of storage), Office Live Workspace (Online collaboration), Spaces (Create your own space), Messenger (PC to PC calling), and Microsoft Office Outlook Live (10GB Inbox).

Spaces
Create your own space

What are the integration points?

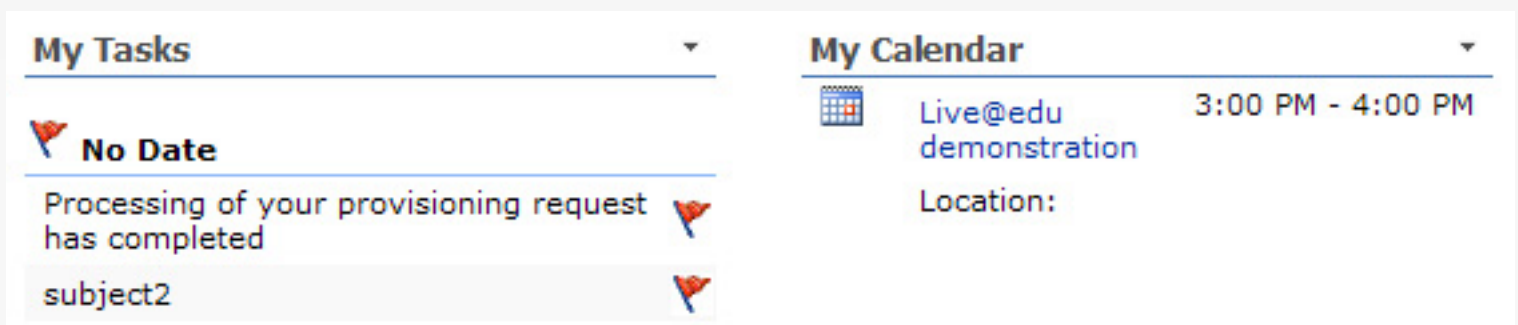

Single Sign-On - no need to enter your credentials more than once on your computer!

Integrated MS Outlook Inbox - grab and check your emails from SharePoint!

Tasks & Calendar web parts - keep and manage the information on any SharePoint page!

Integrated SkyDrive - manage your SkyDrive files on a SharePointLMS Page!

Windows Live Messenger Bar - chat with your friends and colleagues straight away!

How does it work?

Elearningforce International has developed the compiled SharePoint solution containing information about the authentication providers and web parts. All the required SharePoint sources are provided as well. The solution brings Single Sign-On between SharePoint and live@edu.

How to implement?

To install the complete solution you need to process the following steps:

1. First of all you need to deploy the solution provided into your SharePoint.
2. After this the database with user's LiveID need to be connected. This should be setup via SharePoint Central Administration.
3. Setup LiveID authentication via SharePoint Central Administration and <https://msm.live.com> site
4. After the successful installation you will be able to add the new web parts connected to your Live@Edu services having Single Sign-On
