

Merry Christmas & Happy Holidays from ELEARNINGFORCE!

The holiday is upon us and we can look back at a busy year of new product releases, developments and participation in exhibitions and conferences.

In 2010 version 2.1 of SharePoint LMS was released and recently a new registration and enrolment module for SharePoint LMS, SharePoint REM, was launched.

ELEARNINGFORCE had a busy year at exhibitions which included BETT (London, UK), ISTE (Denver, US) and Educause (Anaheim, US).

During 2010 ELEARNINGFORCE have continued to develop their strong relationship with Microsoft. This has resulted in Worldwide Strategic Partner status. Kelvyn Hicks (Sales and Marketing Director) attended this year's Microsoft Worldwide Partner Conference, where he was invited to speak during the educational keynote session.

The New Year is close and ELEARNINGFORCE can reveal some new exciting product developments and releases for 2011. Read more about the current activities in this newsletter.

Best wishes from the ELEARNINGFORCE team

Mette Kuhlmann Frandsen
Marketing and Communication Executive

BETT 2011 - Stand SW10

The yearly BETT show in London is coming up in January 2011 from the 12th to 15th and ELEARNINGFORCE is exhibiting again this year. It would be great to see you at our stand SW10 in the National Hall Gallery.

BETT is the world's leading event for educational technology where education professionals can evaluate and purchase a comprehensive range of ICT products and services. From early years to universities, BETT is an indispensable part of the annual knowledge-gathering process, coming at a time when establishments are planning and budgeting for the new school year. Last year the BETT show had almost 30,000 visitors from all over the world. Read more about the BETT show and register for the conference [here](#).

Mobile Access

The popularity of mobile phones has resulted in a demand for accessing course information from your mobile device. SharePoint LMS is now iPhone app ready and the new WinPhone 7 and Android phone versions will be available in the New Year.

For more information on mobile access contact Mette Kuhlmann Frandsen (mkf@elearningforce.com)

Initiatives for 2011

- Support
With the rapid expanding customer base around the world it is recognised that the demand on the Support Department is growing and cover outside of the European Time Zones will need to increase. We are planning to extend the availability of the Support Team by 50% either side of GMT resulting in support being available earlier for Clients in the East and later for Clients in the West.
- Customer Portal
A new Portal where all customers can logon and see all information regarding their Software, Updates, Releases, Roadmap, find the latest versions of the software to download, report any incidents, consult the Knowledge base etc. The Portal will be released in March 2011
- New Help Desk and Knowledgebase
The Help Desk for SharePoint will allow you to report any incidents and request support. This Help Desk will be linked to a Knowledgebase within SharePoint where any questions posed will generate a list of suggested answers.
