SharePoint LMS 3.1 - NOW RELEASED!

Introducing SharePoint LMS version 3.1

ELEARNINGFORCE is delighted to announce the release SharePoint LMS version 3.1.

SharePoint LMS 3.1 is the new version of ELEARNINGFORCE's world-known learning management system for Microsoft SharePoint 2010. The new version includes many new features to enhance the user experience and support the learning environment.

What's new!

SharePoint LMS 3.1 brings a lot of new and exciting features to the platform to benefit the management of learning activities but also adds value for actual learners of your organisation.

New features include:

- New wizard for creating course from template
- Hide left navigation bar on organisation which lists courses and rooms
- Download multiple learner attachments at once in the assignment tool
- Notification service each time an assignment is returned to the teacher
- Surveys or course assignments can be added to a learning path
- Advanced SCORM grade options (ability to select which parameter will be used in Grade Book for calculating SCORM grade)
- Support for AICC standard
- New quiz Options
- Import grades to grade book or export grades from the grade book to a PDF document
- Unified Grade Book on organisation level
- Comment on grades (comments can be optionally hidden from learners)
- Parental Access - new parental access features

SharePoint LMS 3.1 is currently available in English, Danish and Russian. Other languages will be updated as soon as possible.

About SharePoint LMS

SharePoint LMS is a flexible learning management solution that takes advantage of the powerful Microsoft SharePoint platform and makes a seamless integration to your existing SharePoint intranet, web and more.

The learning management system incorporates the best features available to e-learning today with the flexibility of the SharePoint platform. SharePoint LMS can be tailored to fit your changing business requirements.
