SharePoint LMS 2.1 is ready!

Discover the new version of SharePointLMS from ElearningForce

Version 2.1 is now available and includes many new features and enhancements to improve learning management in your SharePoint environment.

ElearningForce is proud to present SharePointLMS 2.1 which offers new possibilities with more features and functionality. SharePointLMS is now even more advanced, flexible and customisable to fit each organisation and their need for a comprehensive learning management system.

What's new in SharePointLMS 2.1?

Version 2.1 of SharePointLMS contains many enhancements. Below is an extract of the key new features and functionality:

- **Quiz & Assessments**
The native SharePointLMS Quiz Tool has seen many new features added such as import and export to QTI Standards, Individual ' Template Feedback, Hints and new Question Types such as Gab Fill.
- **Global announcements**
Send announcements quickly and easily to all your courses from a single location.
- **Office hours**
A new feature within SharePointLMS that enables Faculty, Teachers and Course administrators to keep Office Hours

How can I get SharePointLMS 2.1?

Already a customer?

ElearningForce can install and setup the new version of SharePointLMS. We can configure the system and take care of data migration. The full installation package costs EUR 1400 (or equivalent currency). Please send an email to mkf@elearningforce.com to book a time for the

online and give the Learners a simple and easy way to book appointments with Course Staff.

- **Syllabus**
Syllabus is an outline and summary of topics to be covered in a course. A syllabus usually contains specific information about the course and can be connected to your SharePointLMS courses.
- **Seating chart**
Our new Seating Chart will give Course Staff a tool to create a plan of the class room and assign seats to learners.
- **Multimedia Server**
Our Document Library now allows for the linking of Multimedia files delivered by Multimedia Servers reducing duplication and file storage space.
- **Grade book**
New enhancements to the grade book include calculation of an Average Weighted Grades calculated grade and auto certification based on passing a set criteria.
- **Roster**
Our Roster provides the Learners and Course Staff with an overview on who is enrolled in the course, their contact details, interests etc. A separate Roster is maintained for both Learners and Staff.
- **Parental Access**
A Parent Portal where parents/carers can quickly and easily see all the information related to their children's homework, grades, announcements, calendar events, teachers contact details etc.
- **Wiki-page library**
Manage all the wiki-pages of the course in a library. Link the different pages of the wiki-library to create a complete knowledge base of the course.

The SharePointLMS Web Part library has now grown, with new web parts providing even more flexibility to deliver the right content on the SharePointLMS pages. It for example includes a composite calendar, that shows information from all courses in one calendar.
