

Going from 0 to 350 MEUR in less than fifteen years, demands a learning organization

Comprising approximately 30 companies, Axload is the leading supplier of lifting and lashing equipment and applications in Europe. The group has grown rapidly by acquisition and organizational growth, by ensuring efficiency, reliability, quality and safety in their processes.

With the goal to support core business concepts and the strategic objectives to share knowledge within the group and development of employees' competences, Axload have deployed Office 365 and LMS365. Deployment of the learning management system is currently in pilot in one company, but the plans are to deploy modern solutions throughout the enterprise with a workforce of more than 1000 employees.

"We implement Office 365 to improve collaboration and support knowledge sharing within the group. We searched for an integrated learning management solution to support the continued development of employees' competences, and training in quality and safety processes, and we selected LMS365.

The system was ready to go within a few hours, and was setup natively in our Office 365 tenant. LMS365 allowed us to deliver training to all Office 365 user instantly - the beauty of cloud based and integrated solutions".

William P. Frank,
Project Manager, Axload
